

TILE AFRICA CONTRACTS LEADS WITH EXPERTISE

Whether you are looking for flooring solutions for an office park, hard-wearing tiles for retail stores or glossy tiles for a major shopping centre development, TILE AFRICA CONTRACTS has specified and supplied tiles for these projects and more.

TILE AFRICA CONTRACTS leads with expertise and experience in the choice of tiles and flooring solutions. As part of NORCROS SA, it enjoys the support of sister company JOHNSON TILES, that produces local tiles as well as the professional backing of TAL Adhesives, their sister company that has been at the forefront of the adhesives industry for 30 years.

One new product that TILE AFRICA CONTRACTS will utilise from TAL is the TAL Goldstar Sealmaster 1000. This is a highly flexible polyurethane-based adhesive and joint sealant that forms a permanently flexible, highly elastic and resistant joint. Ideal for ceramic tile panel movement joints, this product is specified for large areas requiring tiling. A common challenge with joints is the need to allow for expansion and contraction and this is where this product works best.

"Our success can be attributed to our knowledge and access to such a wide variety of products, including our emphasis on our national service delivery. We offer an invaluable service to architects, interior designers, contractors and specifiers and each site is project managed by a specialist in the field," says Craig Irvine, National Contracts Manager for TILE AFRICA CONTRACTS.

TILE AFRICA CONTRACTS offers a full circle of services, from concept to completion nationally.
