

## spacious impressions

*Tiles are extremely practical and easy to maintain, add value to your home and create a sense of space and openness when used in lighter hues*

As a flooring option, tiles add style and elegance to living spaces and the wide selection of materials and colours available from **TILE AFRICA** create numerous choices to suit any décor scheme.

You're sure to find tiles that will tie in with the design of your home or outdoor area, when you are spoiled for choice with extensive selections of porcelain, ceramic, travertine, slate or sandstone.

Tiles in neutral shades effortlessly combine with most décor styles and colour schemes. Polished porcelain tiles in light colours and bigger sizes such as 600x600mm or 800x800mm create a marvellous sense of space, especially indoors, because of the light reflecting off the tile's surface.

By using the same tiles throughout an open-plan area you can create a seamless flow from one room to the next. "Larger format tiles work particularly well in living rooms and open-plan areas," says Kate van Niekerk, marketing manager for **TILE AFRICA**.

Ceramic and porcelain tiles that closely resemble natural stone tiles imitate a natural look, without the extra hassle associated with professional installation and sealing of natural stone. "These tiles are easy to install and just as easy to maintain," says van Niekerk.

To create a spacious impression in a small space takes careful planning, but is not impossible. With the right combination of design and décor elements, the smallest area can appear roomy and inviting.

The colour palette plays an important role and light-coloured floor tiles will make the small room appear bigger than it really is. Here porcelain or ceramic tiles in earthy hues will work wonderfully.

With an extensive selection of tiles and bathroom ware you can be sure to find the right products for your home when you visit any one of the 37 **TILE AFRICA** retail outlets nationwide.
