

Trendsetting style

Turn a tiny bathroom into a stylish haven with these clever tips from TILE AFRICA

Whether you're renovating your bathroom or designing a new one, make the most of the space you have by applying some of these creative ideas.

- Baths that narrow at one end are ideal for smaller areas and corner baths are a good option when there isn't room for a full length bath.
- When space is limited, look at an all in one bath and shower combination instead of a separate shower and keep in mind that curved showers take up less space than a square version.
- Vanity units with self-contained basins are an excellent choice in a small zone

as they conceal ugly plumbing and offer extra storage.

- A wall hung toilet with a concealed flush mechanism gives a more streamlined look and actually frees up floor space.
- Mirrors are wonderful for creating the illusion of depth. For the best results make sure the mirror is in proportion to the vanity and place lights on either side of the mirror to light your face evenly.

With their extensive selection of bathroom accessories, tiles and fittings you'll find the right products for your bathroom when you visit any one of the 37 TILE AFRICA retail outlets nationwide.
