

be.UP Park Cresta

The installation of be.UP Park at Cresta Shopping Centre required a robust and versatile flooring solution to support the demands of a high-energy indoor entertainment venue. The space includes trampolines, rope courses, a giant maze, interactive games, and a toddler-friendly soft-play area—each presenting unique performance and safety requirements. A tailored specification was developed in collaboration with the client, using a combination of PVC tiles, luxury vinyl tiles, and carpet tiles to suit the various zones within the park. The flooring system was supplied with full installation specifications to ensure long-term durability, ease of maintenance, and a seamless finish throughout the facility.
